Hello! I'm Alper Salik, a passionate React Native Developer specializing in cross-platform mobile applications. I've developed user-friendly mobile applications for companies like Setcard and Muni. I work with React Native, TypeScript, Redux, React-Query, Expo, and Firebase to create seamless user experiences. When I'm not coding, I'm exploring new technologies and best practices to stay at the forefront of mobile development. Connect with me on LinkedIn or Email to learn more!

Specialties: React, React Native, TypeScript, JavaScript, Firebase, Detox, React-Query, Html, Css, Redux, Zustand, React-Navigation, Maps, Maestro, Expo, Reactotron

Tools: Android Studio, XCode, Github, Git, Bitbucket, Jira, Npm, Claude Code, Figma

Programming resources used for self-learning: Medium, Stack Overflow, w3schools.com, Udemy, LinkedIn Learning, Patika.dev, BTK Akademi, MDN

Work Experience

Setcard - Mobile Developer

August 2022 - Present

- Setcard Flexlife: Developed from scratch and continuously maintain it with new features and store updates. Technologies used include Firebase, React-Query, TypeScript, Axios, Redux, React-Navigation.
- Setcard Mobil: I planned the design and technical architecture of a new version and contributed to its development.
- Setcard SETPOS: Actively developing and enhancing with new features and regular updates.

Muni - Mobile Developer

December 2021 - August 2022

- I developed a mobile app for Muni's expense management platform and published it in the App Store and Play Store.
- I used React-Native, Redux, React Navigation, Axios, Detox and Swift to develop a Muni mobile app. I wrote the E2E tests with Detox of the application.

Prosistem Electronic - Intern

July 2020- August 2020

- I used the Altium Designer program and designed a PCB card. I observed how engineers design and build light, voice, and LED display systems.

Decathlon - Sales Person

July 2019- August 2020

- Selling and promoting products. To follow the sales up to date and to plan the products or services to be sold.

Barida Machinery - Intern

August 2019- September 2019

- I observed how engineers program the machines using PLC and wrote simple PLC code. I helped in the installation of machine parts, using Adobe designs.
-

Educations and Courses

Bachelor's Degree in Electrical&Electronics Engineering

Institution: MEF University

Year of Graduation: 2020

iOS 101-201 Mobile App Development

Institution: Appcent Academia

October 2023

Inavitas-Başarsoft React-Native Bootcamp

Institution: Patika.dev

September-December 2021

Istanbul React-Native Bootcamp

Institution: Kodluyoruz

60 Hours, July-August 2021

Artificial Learning Winter School

Institution: Koç University - İş Bank

2 Days- March, 2020

Projects

Setcard Flexlife ([App Store](#)) ([Play Store](#))

Technologies: React-Native, Redux, React Navigation, Axios, Firebase, React-Query, TypeScript

Features: In this app users can buy coupons from different merchants like A101, Teknosa, Ikea. They can pay directly from a digital card in shops like Boyner, Mavi, Koton or they can use QR payment in markets and restaurants.

Setcard Mobile ([App Store](#)) ([Play Store](#))

Technologies: React-Native, Redux, React Navigation, Axios, Swift, Detox

Features: In this app users can pay with QR code. They can see their Setcard budget and transaction history.

SETPOS ([App Store](#)) ([Play Store](#))

Technologies: React-Native, Redux, React Navigation, Axios, React-Query, TypeScript, NFC

Features: In this app users can use their phones as pos device. They can get payment with QR code and Setcard payment card.

Muni Mobile App ([App Store](#)) ([Play Store](#))

Technologies: React-Native, Redux, React Navigation, Axios, Swift, Detox

Features: In this app users can manage their expenses, they can scan bills and managers can see the expenses.

Taksimmetre App: ([App Store](#)) ([Play Store](#))

Technologies: React-Native, Adapty, Zustand, Firebase, Maps, Figma, Git

Features: I made a React-Native taxi meter amount calculator app. Users can search and pick address from map and app calculates the amount of taxi prices.

Rick and Morty App ([Play Store](#))

Technologies: React-Native, Android Studio, Lottie Animation, Axios, JavaScript

Features: I made an App that shows the information of the episodes of the Rick and Morty series by calling the data with Axios from Api.

ToDo App ([Play Store](#))

Technologies: React-Native, Android Studio, Lottie Animation, Async Storage

Features: I made a React-Native ToDoApp using Lottie animation and Async Storage and shared it on Google Play.
